

Mask drying cabinet MTS 1800

Mask drying cabinet for drying up to 9 masks

Two door drying cabinet for drying up to 9 masks. The cabinet is made of high-grade steel including door lock. An efficient and gentle drying is guaranteed by the continuing movement of the rotary disc.

Depending on the room temperature, the drying time is approx. 15 - 30 minutes.

Advantages

- timer is easy to use
- temperature control via capillary sensor
- requires little space, wall mounting possible
- rotary disc can be removed
- safety precaution: unit shuts down automatically when door is opened
- maintenance free radial fan
- maintenance free stepping gear motor 1U/min

Technical details

- electr. connection: 230 volts-/50Hz (EUR plug)
- made of high-grade steel, Plexiglas
- please note that the UV irradiated drying air does not replace the disinfection of the masks

Optional upgrades & accessories

- small parts basket (aluminum round wire)
- small parts basket (stackable, made of high-grade steel)
- couplers for breathing tube (medium pressure tube)
- timer with LED display, quartz-controlled, the active programming remains valid even when the unit is currentless
- electric temperature sensor with LED display for an exact and individual temperature setting
- mounting aid for rotary disc
- UV light for air disinfection (no irradiation of masks)
- PHI Clean Air odor removal & disinfection
- rotary disc
- mobile frame (high-grade steel) on 4 movable wheels
- adjustable feet
